

Dependent-variable coverage across 14 open HCI datasets

After schema-driven standardization, mean pairwise DV overlap is only Jaccard = 0.105. DVs spanning ≥3 studies: Mental Demand (k=10), NASA-TLX (overall) (k=4), Effort (k=4), Frustration (k=4), Performance (TLX) (k=4), Physical Demand (k=4), +3 more; 3 sensor/log datasets expose no canonical questionnaire DV.
