

OpenDV-HCI: standardizing dependent variables turns fragmented open datasets into comparable, synthesizable evidence

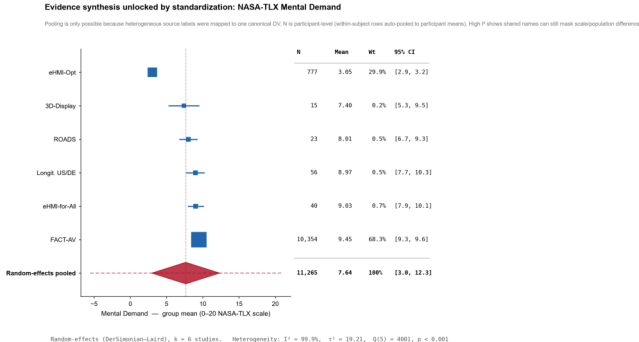

(a) DV coverage across 9 datasets

(b) Pairwise overlap (Jaccard)

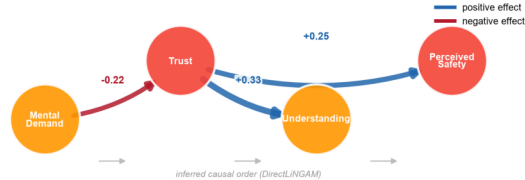

(c) Meta-analysis: Mental Demand

(d) Cross-study causal structure

Cross-study causal structure among standardized DVs

DirectLiNGAM on pooled within-study z-scores (complete-case, non-synthetic; n = 10,354 obs). Edge weights are structural coefficients.
